

1) $-5(5 + 3(10 - 6)) - 4^2$

2) $-3(12 - 15)^2 + 20 - 7$

3) $-2(-4(5 - 3) - 9) + 7$

4) $100 \div 5 \cdot 2 \cdot 8 \div 4 + 7$

After completing #1-4, follow these directions:

Take the answer to #1 and add it to #2.

Subtract the sum above from the answer to #3.

Multiply the difference above by -2 and add it to the answer of #4.

Your answer is:
